WHITE ZINC PAINT.

After thorough test in Europe and the United States, has been found to retain its beauty and protective qualities longer than any other paint. For whiteness and brilliancy it is unrivaled; it is free from all poisonous properties so common and dangerous in other pigments; will cover—equal weight—from 40 to 100 per cent. more space than lead, and is, therefore, much cheaper to the consumer. As an inside paint, it will not turn yellow, even when exposed to the sulphurous gases of coal fires or the foul air of slips. Their White Zinc ground in varnish produces the porcelant finish. Their BROWN AND BLACK ZINC PAINTS in a few hours form a hard and solid metallic coating upon wood, brick, iron and other metallic surfaces, are remarkable for their fire-proof properties. They are specially adapted for marine purposes, having been found to resist the corroding action of selt water, so destructive to other paints. Dealers supplied on liberal terms by

As such is the case, we would advise all mothers to obtain a bottle, and thus save themselves much sickness. The Daily News, July 24, says: "A MEDICINE—We speak of Dr. Hoofland's German Bitters, when we say it is a blessing of this age; and in diseases of the biliary, digestive and nervous systems, it has not, we think, an equal. It is a vegetable preparation, and made without alcohol, and to all invalids we should recommend it as worthy of their confidence."
